ELSEVIER

European Journal of Operational Research 111 (1998) 650–651

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 111

1 Perspectives on operations research in data and knowledge management
A. Basu

15 Dynamic promotional budgeting and media allocation
G.E. Fruchter and S. Kalish

28 Price, delivery time guarantees and capacity selection
K.C. So and J.-S. Song

50 Data envelopment analysis vs. principal component analysis: An illustrative study of economic performance of Chinese cities
J. Zhu

62 Measuring production with random inputs and outputs using DEA and certainty equivalent
L. Gong and B. Sun

75 Optimal control of a divergent multi-echelon inventory system
E.B. Diks and A.G. de Kok

98 Forward–reserve allocation in a warehouse with unit-load replenishments
J.P. van den Berg, G.P. Sharp, A.J.R.M. (Noud) Gademann and Y. Pochet

114 Dynamic lot-sizing with price changes and price-dependent holding costs
A. Martel and A. Gascon

129 Using tabu search to schedule activities of stochastic resource-constrained projects
Y.-W. Tsai and D.D. Gemmill

142 The gap function of a convex multicriteria optimization problem
G.Y. Chen, C.J. Goh and X.Q. Yang

152 A branch-and-bound procedure for the resource-constrained project scheduling problem with generalized precedence relations
B. De Reyck and W. Herroelen

175 Optimum component test plans for systems with dependent components
I.K. Altınel and S. Özekici

187 OR Software
H. Thiriez

189 Editorial
A.K. Manrai

193 Two-stage discrete choice models for scanner panel data: An assessment of process and assumptions
A.K. Manrai and R.L. Andrews

216 Error structure and identification condition in maximum likelihood nonmetric multidimensional scaling
M. Abe

228 Models of health plan choice
C. Abramson, T. Buchmueller and I. Currim

248 Feature-based elimination: Model and empirical comparison
R.L. Andrews and A.K. Manrai

268 A perceptual mapping procedure for analysis of proximity data to determine common and unique product-market structures
A. Chaturvedi and J.D. Carroll

285 A Bayesian approach to the spatial representation of market structure from consumer choice data
W.S. DeSarbo, Y. Kim, M. Wedel and D.K.H. Fong

306 Brand diagnostics: Mapping branding effects using consumer associative networks
G.R. Henderson, D. Iacobucci and B.J. Calder

285 A Bayesian approach to the spatial representation of market structure from consumer choice data
W.S. DeSarbo, Y. Kim, M. Wedel and D.K.H. Fong

306 Brand diagnostics: Mapping branding effects using consumer associative networks
G.R. Henderson, D. Iacobucci and B.J. Calder

328 A hierarchical elimination modeling approach for market structure analysis
S. Park, D. Jain and L. Krishnamurthi
351 Modeling ordered decision making in product development
V. Krishnan
369 A new approach for technical efficiency estimation in multiple output production
J. Ruggiero
381 Periodic review stochastic inventory problem with forecast updates: Worst-case bounds for the myopic solution
S. Gavirneni, S. Bollapragada and T.E. Morton
393 Call admission control schemes and ATM network topological design
S.Z. Lo, B.A. Makrucki, G.L. Bilbro and S.E. Elmaghraby
405 Manpower allocation using genetic annealing
N. Abboud, M. Inuiguchi, M. Sakawa and Y. Uemura

421 Valedictory Editorial
A. Mercer, C.B. Tilanus and H.-J. Zimmermann
423 Strategic facility location: A review
S.H. Owen and M.S. Daskin
448 Model tightening for integrated timber harvest and transportation planning
M. Guignard, C. Ryu and K. Spielberg
461 Non-discretionary inputs in data envelopment analysis
J. Ruggiero
470 DEA and the discriminant analysis of ratios for ranking units
Z. Sinuany-Stern and L. Friedman
479 Multi-depot vehicle scheduling problems with time windows and waiting costs
G. Desaulniers, J. Lavigne and F. Soumis
495 A utility measure for finding multiobjective shortest paths in urban multimodal transportation networks
P. Modesti and A. Sciomachen
509 An iterative improvement approach for the nonpreemptive open shop scheduling problem
C.-F. Liaw
518 Eliminating redundant columns in continuous tour scheduling problems
M.J. Brusco and L.W. Jacobs
526 Information theoretic framework for process control
L.C. Alwan, N. Ebrahimi and E.S. Soofi
543 The plant location problem with demand-dependent setup costs and centralized allocation
I. Averbakh, O. Berman, Z. Drezner and G.O. Wesolowsky
555 Linear regression estimators for multinormal distributions in optimization of stochastic programming problems
I. Deák
569 Goal programming for decision making: An overview of the current state-of-the-art
M. Tamiz, D. Jones and C. Romero
582 Parametric linear programming and cluster analysis
A. Joseph and N. Bryson
589 Probabilistic linear programming problems with exponential random variables: A technical note
M.P. Biswal, N.P. Biswal and D. Li
598 Iterative bundle-based decomposition for large-scale nonseparable convex optimization
K. Park and Y.-S. Shin
617 The problem of the optimal biobjective spanning tree
R.M. Ramos, S. Alonso, J. Sicilia and C. González
629 *Geo/G/1* discrete time retrial queue with Bernoulli schedule
H. Li and T. Yang
650 Contents Volume 111
652 Acknowledgement to Referees
657 Invited Reviews 1994–1998
659 Feature Issues 1989–1998
661 Keyword Index Volumes 104–111 (1998)
669 Author Index Volumes 104–111 (1998)
688 Book Review Index Volumes 104–111 (1998)
